

LOGY

**Best in Class
Purchasing development tool**

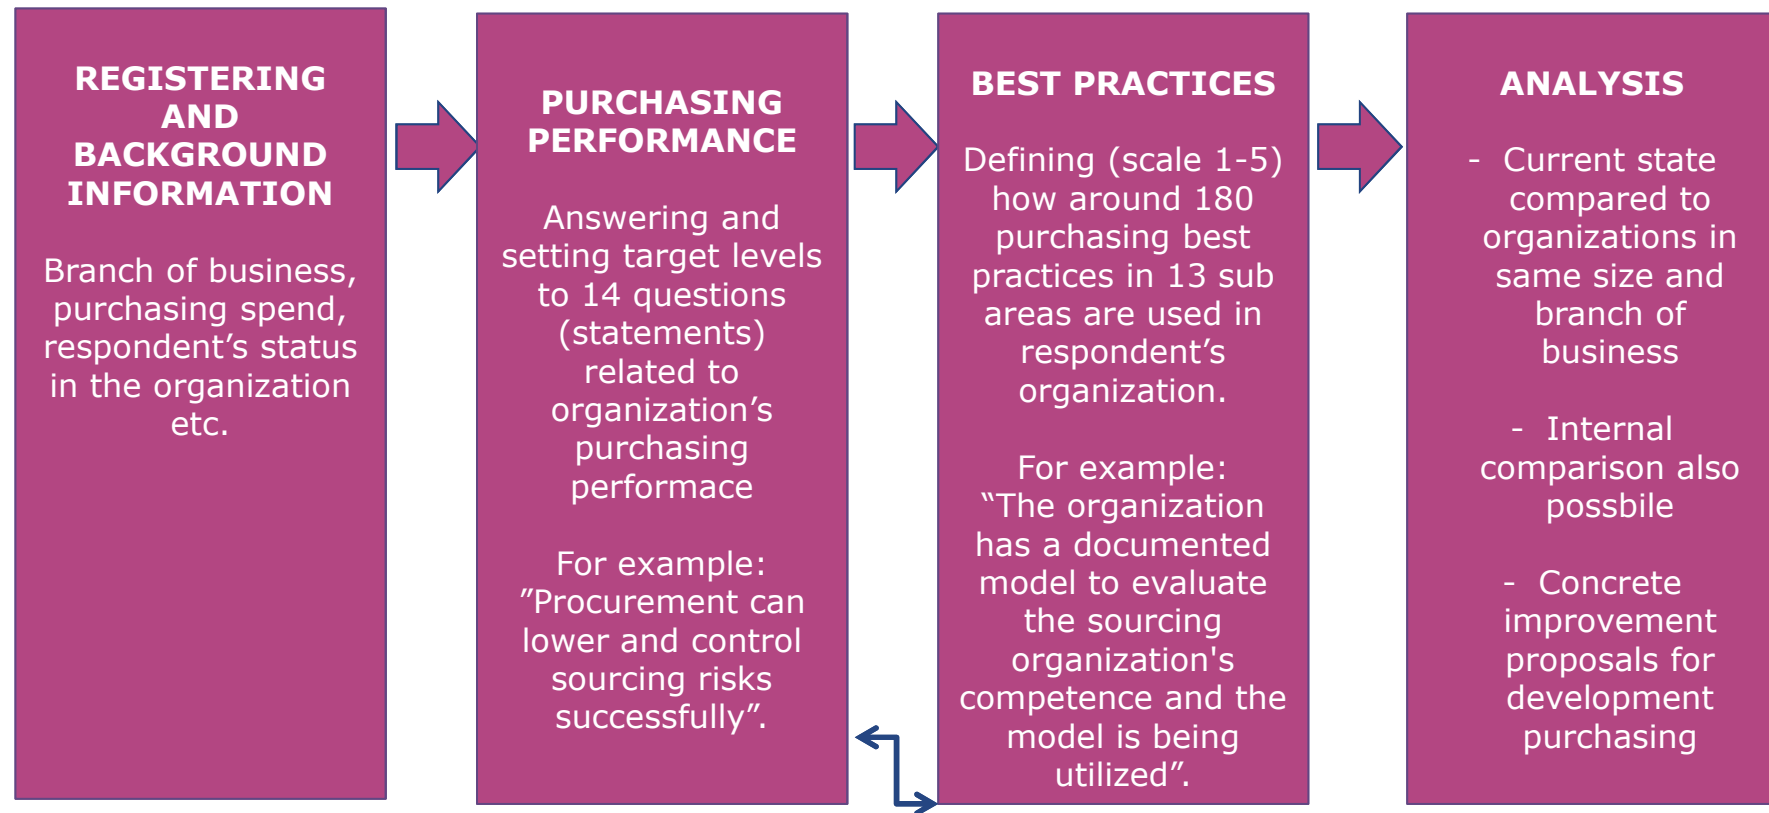

Best in Class –tool

- targeted for LOGY's member companies in all sizes
- gives a clear description of organization's purchasing state
- allows companies to benchmark the purchasing state in the same industry sector and size
- suitable for the private and public sector organizations

Useful analyses

- Best in Class tool **analyzes organization's procurement activities** and produces **concrete proposals for improving purchasing performance!**
- Limited number of respondents in the same organization → internal comparison possible
- *Analyses can be used for further purchasing development.*

Idea of Best in Class -tool

Correlation

www.bestinclass.fi

- Best in Class is a cloud service
- The respondents' privacy is assured
 - The responses entered in the service will be handled strictly as confidential.
 - The responses can be used for research and educational purposes with LOGY's permission so that the user's anonymity will be ensured at all times.
- Finnish and English versions available
- Updating answers yearly is recommended
